Side Gusset Bags Product Specifications

Side gusset bags are a classic and economical option, providing a box like shelf presence and great packing efficiency.

These side gusset bags have a wide open top that is great for automated or hand filling. The inner plastic layer is designed to allow these bags to be heat sealed. The PBi Filtered Valve is a one way valve designed to allow gas produced by coffee beans to escape, without letting an oxygen in.

All of our stock products are certified food grade and contain a plastic lined inner layer to help ensure product freshness.

Our stock packaging is available to purchase immediately with low minimum order quantities and are a great option for branding using labels/stickers or stamps (for kraft bags).
